EKJV Exploration

For the quarter, a mine-scale remodelling exercise has commenced for exploration target generation.

Drilling was forecast to commence at Raleigh underground and was delayed due to a delay for the mining sequence.

WORK COMPLETED

The mine scale geological model process commenced during the quarter. The purpose of the updated geological model is to improve geological understanding of gold mineralisation and generate further exploration targets.

The mine scale geological model extends from approximately three kilometres along strike of the main K2 mineralised corridor and focusses on interpreting structural and stratigraphic relationships.

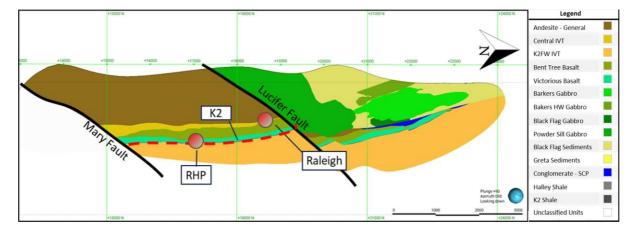

Figure 1: Image of the current Mungari lithological model in plan - remodelling has commenced between the Lucifer Fault and Mary Fault Zones

FUTURE WORK

Future work will continue targeting as the geological re-interpretation work is completed. Drilling is planned to recommence around the upper Skinners lode aiming to convert Inferred to Indicated mineral resource.
