

STARLINK

Starlink is now available in limited supply in Australia! Initial beta service is available in parts of central Victoria and southern New South Wales. Service will expand across the country in the coming months.

Users can expect to see data speeds vary from 50Mb/s to 150Mb/s over the next several months as we enhance the Starlink system. There will also be brief periods of no connectivity at all.

As we launch more satellites, install more ground stations and improve our networking software, data speed, latency and uptime will improve dramatically.

To check availability for your location, visit starlink.com and re-enter your service address. If Starlink is not yet available in your area, you can place a deposit to hold your space in line for future service.

Order Starlink

Nyngan Way, Macquarie Park NSW 2113, Australia

Starlink is targeting coverage in your area in mid to late 2021. You will receive a notification once your Starlink is ready to ship.
